

High Powered Magnet - TT0381

Description

The High Powered Magnet is used to retrieve small objects, such as metal fragments, balls, small slips, springs, and any other objects that have a magnetic attraction. Only advanced high power, long life magnets are used for extended operational life.

Operation

Due to the magnetic force of the High Powered Magnet, it is highly recommended that a centralizer/stabilizer be run in conjunction with this tool. This will decrease sidewall drag along with the possibility of extreme sidewall wear on the magnet.

| Part Number | OD | |
|----------------|-------|-------|
| | in. | mm |
| TT0381-125A-SS | 1.25 | 31.8 |
| TT0381-150A-SS | 1.500 | 38.1 |
| TT0381-169A-SS | 1.688 | 42.9 |
| TT0381-181A-SS | 1.813 | 46.1 |
| TT0381-184A-SS | 1.844 | 46.8 |
| TT0381-206A-SS | 2.063 | 52.4 |
| TT0381-230A-SS | 2.300 | 58.4 |
| TT0381-270A-SS | 2.703 | 68.7 |
| TT0381-350A-SS | 3.500 | 88.9 |
